

REPUBLIC OF BULGARIA

Ministry of Tourism

Secretary General

T-26-H-89/20.11.2005

Based on the research and review of products providing active monitoring (continuous monitoring) of hardware devices, software resources, network infrastructure, with which to make quick decisions and respond in a timely manner to emerging threats and problems, as well as and with regard to the „Ordinance on the minimum requirements for network and information security“, the Ministry of Tourism chose to partner with NIKRAMA Ltd. and to implement the Axence nVision® software platform.

We rely on Axence nVision® to provide information security and protection, asset management, monitoring, hardware and software audit, remote IT resource management, user behavior monitoring and HELP DESK.

With the help of nVision we provide mobile workstations with a secure, encrypted connection and environment, control, management and monitoring of the activities of users working remotely / Home Office /.

In the process of our joint work on the procedure for purchasing licenses and installation and configuration services, NIKRAMA Ltd. has proven to be a reliable and fair partner.

With this reference we express our recommendation to NIKRAMA Ltd. and the Axence nVision® software platform.
